SECOND GENERATION

DESIGNED BY JOSEPH YEAP

Incorporating LINAK actuators

10 REASONS WHY HEIGHT ADJUSTABLE WORK STATION

Today's workplace is changing. Sitting at a desk all day is no longer acceptable for a workforce wanting more flexibility, increased comfort, and improved health. Sitting all day has proven to be unproductive, uncomfortable and unhealthy.

According to research:

- + Sitting is associated with an increased risk of diabetes, heart disease, and death.
- + Sitting strikes approximately 92,000 people each year with avoidable cancer.
- + If you sit for a living, your risk of developing cardiovascular disease is twice that of someone who stands on the job.
- + Sitting six-plus hours per day makes you up to 40 percent likelier to die within 15 years than someone who sits fewer than three, even if you exercise.
- + Sitting is said to be as deadly as smoking.
- + Sitting causes good cholesterol levels to drop after two hours.
- + Researchers have linked sedentary behavior to increased risk of several forms of cancer and blood clots, which can cause strokes and heart attacks, among other health problems.
- + Sitting causes the risk of diabetes to increase 24 percent.
- + One study found that sitting for less than three hours a day could increase life expectancy by two years.
- + When we sit, electrical activity in the legs shuts down enzymes that help break down fat by 90 percent and calorie burning drops to one per minute.

Employers and employees alike are looking for new alternatives.

With an increased concern for workforce health, and pressure to decrease health insurance costs, employers are looking for new ways to improve employee health and productivity.

SOME DETAILS ARE NOT MEANT TO BE SEEN. BUT TO BE FELT

AD+L crafted for smooth adjustment. Armed with a precision leg, it ensure every part turns out exactly as intended, delivering a steady and responsive adjustment.

THE CLEVER FEATURES

- + Anti-collision technology. This feature prevents material damage to desk if a collision with a solid object occurs
- + Conceal cable management system
- + Compact lightweight state-of-the-art control box up to 4 channels in parallel. Universal input (300W)
- + Height adjustable electric actuator ensuring that you get the best result when come to sound level and use

SPECIFICATIONS

At a adjustable length of 750 mm to 1200 mm. Thus, the desk can be used for sitting as well as standing type of work.

- + Compact design where frame structure and actuator legs functions are an integrated unit
- + 25 mm thick European E1 grade melaminated faced particle board with 3mm thick impact resistant PVC edging
- + Reinforced column and optimised motor housing design for extra strength and stability
- + Max. speed: 38 mm/s unloaded Low noise level
- + Slot in screen
- + Anti-collision minimising the risk for damages on a desk caused by squeezing or blocking it in upward or downward direction
- + Undertable cable tray
- + Colour: black (RAL 9005), grey (RAL 9006) or white (RAL 9016)
- + Conceal cable management
